Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions. Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Strategic Product Placement Analysis

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

10 minutes to prepare
1 hour to collaborate
3-5 team members

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

10 minutes

A Team gathering

Invite each team member to participate in the session and share relevant information or pre-work ahead.

B Set the goal

Think about the problem you'll be focusing on solving in the brainstorming session.

C Collect required information

- Sales Data
- Customer Purchase History
- Product Details & Categories
- Inventory Data
- Store / Regional Information
- Competitor Insights

D Understand the tools

Use the following tools for data analysis and visualization to run a happy and productive session.

 Tableau

 Excel

 SQL

 Power BI

 Python (Optional)

1 Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

PROBLEM

“ How might we improve product placement using sales analytics and customer behavior to increase business profitability? ”

Key rules of brainstorming

To run a smooth and productive session

 Stay in topic.

 Encourage wild ideas.

 Defer judgment.

 Listen to others.

 Go for volume.

 If possible, be visual.

Expected deliverables

 Interactive Dashboard

 Product Placement Recommendations

 Customer Behavior Analysis

 Inventory Optimization

 Profitability Insights

1.Team Gathing

The project team came together to discuss real-world challenges faced by retail businesses in product placement and sales performance. Each member shared ideas based on customer behavior, inventory management, and sales analysis

2. Collaboration

The team collaborated by sharing insights, analyzing sales data, and discussing customer purchasing patterns. Responsibilities were divided among members for data collection, analysis, dashboard design, and documentation.

3. Select the Problem Statement

Retail businesses often face difficulties in placing products effectively, leading to lower sales and reduced customer engagement. The project aims to analyze sales trends and customer buying behavior to recommend the best product placement strategies.

Step-2: Brainstorm, Idea Listing and Grouping

2 Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

TIP

You can select a sticky note when it has people sharing similar icons to start drawing.

Project: Strategic Product Placement Analysis

Problem Statement: How might we improve product placement using sales analytics and customer behavior to increase business profitability?

Amar	Yuktesh	Person 3	Person 4
Analyze sales trends by category	Analyze product position vs sales	Compare online vs offline sales	Customer demographics analysis
Identify best selling products	Heatmap of high/low sales zones	Top 10 products by revenue	Identify peak sale timings
Find low performing products	ABC analysis for products	Identify slow moving products	Track inventory turnover rate
Evaluate seasonal product	Customer segmentation analysis	Recommend better shelf placement	Create KPI scorecard
Compare store-wise performance	Basket analysis	Study repeat purchase placement	Analyze regional performance
Optimize shelf placement	Evaluate price impact on product sales	Find products with high return rate	Predict demand using historical data
Increase product visibility	Real-time sales monitoring	Product rotation strategy	Identify placement gaps
			Optimize end-cap placements
			Improved in-store experience

Person 5	Person 6	Person 7	Person 8
Sales funnel analysis	Cluster products based on similarity	Products bought together	Top customer buying behavior
Conversion rate by product	Category wise profitability	Identify loyal customers	Build interactive dashboards (Tableau)
Identify impulse products	Identify high traffic zones	Geographic sales analysis	Sales map by region
Visual merchandising impact	Shelf allocation analysis	Sales by payment methods	KPI: Sales, Profit, Quantity, Growth
Market basket trends	Planogram optimization	Geographic sales analysis	Drill-down by category / sub-category
Compare weekday vs weekend sales	Analyze dwell time in store	New product placement ideas	Alert for low performing products
Store layout optimization	Evaluate space utilization	Discount campaign impact	Scenario analysis
Increase average order value	Demand forecast		Increase placement recommendation
			Boost overall profitability

3 Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

20 minutes

TIP

Add customizable tags to sticky notes to make it easier to find, review, organize, and create custom-designed visuals as themes within your mural.

1. Brainstorm

The team conducted a brainstorming session to generate ideas for improving product placement using sales and customer data. Different approaches such as sales trend analysis, customer behavior analysis, inventory optimization, and dashboard visualization were discussed. All ideas were considered to identify the most effective solution.

2. Idea Listing

The team listed key ideas including analyzing best-selling products, identifying low-performing products, studying customer purchasing patterns, comparing regional sales, and creating interactive Tableau dashboards.

3. Idea Grouping

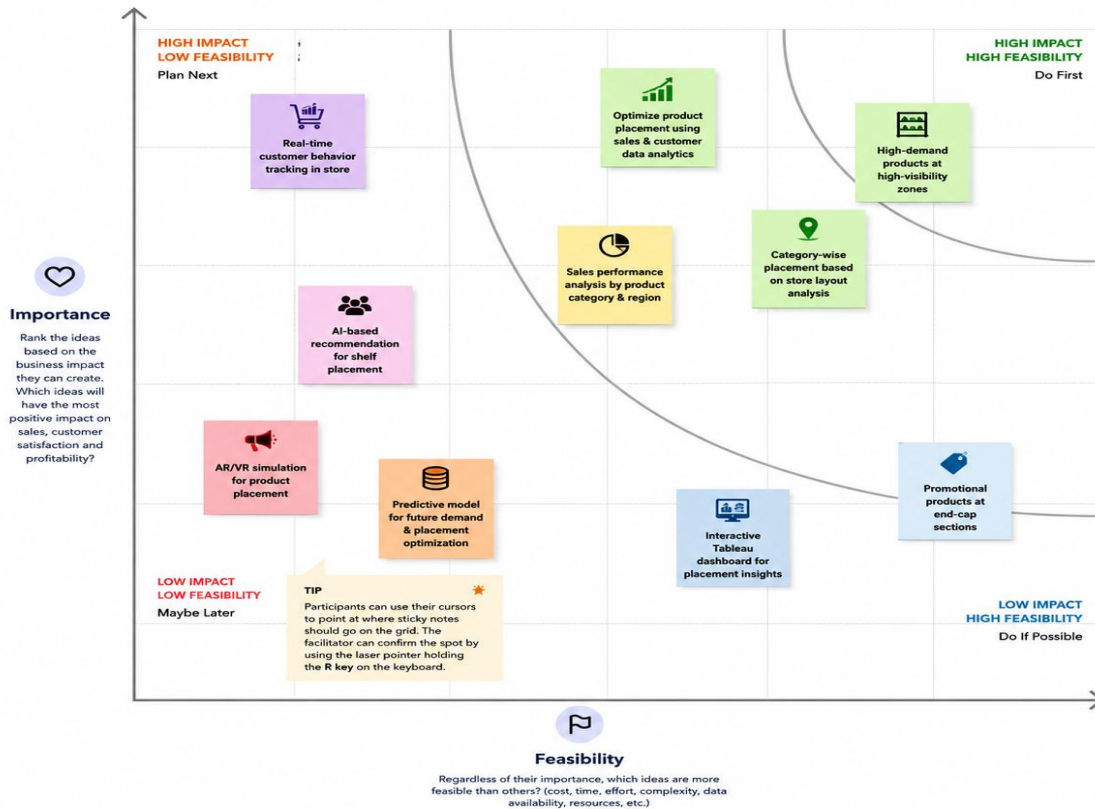

The generated ideas were grouped into categories such as Sales Analysis, Customer Behavior Analysis, Product Performance, Inventory Management, and Data Visualization. Grouping the ideas helped the team organize tasks efficiently and focus on developing a comprehensive product placement strategy.

Step-3: Idea Prioritization

4 Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

⌚ 20 minutes

1. Idea Evaluation

The team evaluated all the brainstormed ideas based on business impact, feasibility, innovation, data availability, and implementation complexity. Each idea was carefully analyzed to determine its potential to improve product placement and increase sales.

2. Idea Prioritization

After evaluation, the team prioritized ideas that provide the highest business value. Sales analysis, customer behavior analysis, product performance analysis, and interactive dashboard development were identified as the top priorities

3. Final Selected Idea

The team finalized **Strategic Product Placement Analysis** as the project solution. The project focuses on analyzing sales trends, customer purchasing patterns, and product performance to recommend optimal product placement strategies
