

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	
Team ID	
Project Name	
Maximum Marks	

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Dashboard Overview	Display overall product placement dashboard.Show KPI summary and sales insights.Provide interactive dashboard navigation.
FR-2	Product Category Analysis	Compare average sales volume by product category.Identify best-performing product categories.Display category-wise visualizations.
FR-3	Product Placement Analysis	Analyze sales based on shelf/product position.Compare front, middle, and back shelf performance.Display placement impact charts.
FR-4	Seasonal Sales Analysis	Compare sales across different seasons.Identify seasonal trends.Display seasonal sales charts.
FR-5	Competitor Price Analysis	Compare competitor prices with product prices.Visualize price differences.Identify competitive pricing opportunities.
FR-6	Consumer Demographics Analysis	Analyze customer demographics.Compare sales by age group and customer segment.Display demographic charts.
FR-7	Foot Traffic Analysis	Compare foot traffic with average sales volume.Identify peak shopping periods.Display foot traffic analysis.
FR-8	Promotion Impact Analysis	Analyze promotional offers on sales and pricing.Compare promoted and non-promoted products.Display promotion effectiveness.
FR-9	Interactive Dashboard Filters	Filter dashboard by category, season, product position, and promotion.Update all charts dynamically.
FR-10	Dashboard Publishing & Web Integration	Publish Tableau dashboard.Embed dashboard into Flask web application.Provide online dashboard access.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	The dashboard should have a simple, user-friendly interface with easy navigation and interactive visualizations.
NFR-2	Security	Only authorized users should be allowed to modify project files. Published dashboards should use secure Tableau links.
NFR-3	Reliability	The dashboard should display accurate data consistently without errors or crashes.
NFR-4	Performance	Dashboard visualizations should load within a few seconds and respond quickly to filter selections.
NFR-5	Availability	The Tableau Public dashboard and Flask web application should be accessible whenever an internet connection is available.
NFR-6	Scalability	The system should support larger datasets and additional visualizations without significant performance degradation.
